

Crane Copper Tube

Pair Coil Bender

SIMPLE, CLEAN & EFFECTIVE

COPPER TUBING → TUBING SYSTEMS → PAIR COIL → ACCESSORIES

Crane Copper Tube Pair Coil Benders are manufactured from high grade extruded polyethylene providing superior tube bending performance without the risk of kinks. High quality polyethylene provides optimum bend angle while still allowing the coil bender to be extracted with ease.

Crane Copper Tube – Pair Coil Benders

- **Simple:** Crane Copper Tube Pair Coil Benders are a simple, easy to use accessory that allows you to quickly and efficiently bend pair coil tubing.
- **Prevents Tube Kinks:** The flexible polyethylene rods ensure an even radius bend, preventing excessive stress on tube walls, and thereby preventing kinks.
- **Clean:** No mess, no fuss, low friction, smooth polyethylene surface means no on-site clean up, and no contamination of the tubing.
- **Effective:** The flexibility and surface properties of the polyethylene allows the bender to easily slide into and out of the pair coil tubing.
- **Reliable:** Allows you to achieve tighter bends while preventing tube kinks. The best way to ensure you get the required bends time and time again.
- **Saves Time:** Saves you time with reliable bends in just seconds without effort.
- **Saves Money:** No more kinks – no more wastage of kinked tubing – and no more time wasted on re-bending or extra joints.

Pair Coil Bender Specifications

Crane Item Number	Pair Coil Tube Size		Bender Outside Diameter (mm)	Bender Length (metres)
	inches	mm		
50108889	1/4"	6.35	4	1.7
50108882	3/8"	9.52	6	4
50108884	1/2"	12.70	9	4
50108886	5/8"	15.88	12	4
50108888	3/4"	19.05	16	4
